

Dear student,

Are you a (bio)medical student and interested in learning about the latest (bio)medical research?

The International Student Congress Of (bio)Medical Sciences (ISCOMS) is the world's leading student congress in the field of (bio)medical sciences. ISCOMS is Europe's largest biomedical student congress and attracts more participants each year. The 30th edition of ISCOMS will take place **from the 5th until the 8th of June 2023**.

The programme of the congress consists of a pre-course on improving your research skills and three congress days. During the three congress days, ISCOMS offers students the opportunity to present their research. Additionally, students can take part in interactive workshops.

Furthermore, during the congress there will be several keynote lectures from world renowned speakers including **Maybritt Kuypers MD, who will give a lecture about her position as a flight surgeon for the ESA. As well as Prof. Robert S. Langer Sc. D, who has won over 220 major awards in biomedical technology.**

On top of all this, we will host an exciting social programme to give participants a chance to broaden their networks and get to know each other!

Do you want to visit an international congress where you can experience interesting lectures from award-winning scientists, participate in interactive workshops and broaden your scientific network with students from all over the world?

Go to our website: www.iscoms.com and register now! For more information you can always send an e-mail to iscoms@umcg.nl or watch the [ISCOMS 2023 trailer!](#)

Kind regards,

Tessa van Delden & Koen de Groot
